- REMOVE FORM 4136N:** Form 4136N, Nebraska Non-highway Use Motor Vehicle Fuels Credit Computation, is no longer used to obtain non-highway motor fuels credit. Instead, a direct refund is claimed through filing a Nebraska Motor Fuels Tax Refund Claim, Form 84. As a result, this form is being removed from income tax processing and eliminated from these specifications.
- REMOVE LINE 30 FORM 4136N CREDIT:** In addition to removing all references to Form 4136N from these specifications, 1040N Line 30 will no longer be used to report this credit.

- **ADD LINE 30 FORM 3800N REFUNDABLE CREDIT:** The LB 608 refundable credit will no longer be reported on the same line as the Beginning Farmer credit line. The LB 608 credit will now be reported in Line 30. On a related topic, Line 23 has been renamed to Form 3800N Nonrefundable Credit. **Neither Line 23 nor Line 30 is eligible for e-file.**
- **ADD NEW LINE; BONUS DEPRECIATION RECOVERY ON NEBRASKA SCHEDULE I:** If the taxpayer previously reported 85 percent of any **federal special bonus depreciation** to Nebraska for tax year 2001 and/or 2002, you can subtract 20 percent of the total bonus depreciation added back in those years for tax year 2005. This value will be reported on a new line (Line 52) on Nebraska Schedule I.
- **NEW CHILD CARE CREDIT FIELDS REQUIRED IN THE GENERIC RECORD:** In an effort to prevent abuse of this refundable credit, the department will require additional information about the care provider and the qualified persons. This data is in addition to the data currently being collected in the Nebraska Child Care Credit Worksheet in the Generic Record. The department will support a maximum of 5 occurrences of provider information and 5 occurrences of qualified person information. If the taxpayer needs to report additional providers or persons, the return will have to be filed as a paper return. Additionally, to enforce the rules associated with reporting this data, new Reject Codes will be created to require that this information be present when this refundable credit is claimed.
- **DECEASED TAXPAYERS:** A surviving spouse will be allowed to e-file a joint return to claim a refund. A Reject Code will be added to the e-file system to ensure that for returns with a date of death present; the Filing Status must equal **2** (Married Filing Joint), **the return must be a refund return**, only one date (either Primary or Spouse) is present, and this date must equal the current tax year or the current tax year plus 1. These returns can be e-filed by a surviving spouse (not a personal representative) in order to claim a refund for a deceased spouse. Returns requiring a Death Certificate or a Nebraska Form 1310N cannot be e-filed.
- **HIGH SCHOOL DISTRICT CODE CHANGES:** The following changes have been announced for tax year 2005 High School District Codes:

RESIDENT COUNTY	TYPE OF CHANGE

The phase out threshold for computing this credit is also changed. See the 2005 Nebraska Personal Exemption Credit table, located in Appendix G, Miscellaneous Tables document, for credit phase out values.
- **NEBRASKA SCHEDULE II EDIT REJECT CHANGES:** Edits for Nebraska Schedule II have resulted in a high incidence of rejects that could be avoided with some minor changes. Reject Code 0407 (A Nebraska Schedule II was entered, but the postal abbreviation indicating the other state, was invalid or missing) will no longer be issued unless all lines on the Schedule II are present. Reject Code 0408 (A Nebraska Schedule II was entered, but has lines missing) will not be issued unless a value exists in 1040N Line 20 and the Credit For Prior Year Minimum Tax Indicator is '0'.
- **REMINDER TO DEVELOPERS:** The department is requesting developers to better inform their customers that; **(1) Nebraska does not require Form 8453N sent to the Department.** (We understand that some software gives taxpayers a message indicating this form is to be mailed). The only exceptions are when the return is that of the ERO, or VITA and TCE sites; and **(2) Nebraska does not require Electronic Return Originators to provide their federal Form 8633 or otherwise register with Nebraska.**

# SECTION 1

## GENERAL INFORMATION

### 1.1 INTRODUCTION

This document is the software developer specifications for those developers supporting the State of Nebraska in the tax year 2005 Federal/State Electronic Filing program. We extend our thanks to all developers participating in this program.

### 1.2 NEBRASKA PUBLICATIONS

These specifications define the Nebraska Department of Revenue generic and unformatted record formats, and related information used in the Federal/State Electronic Filing Program. This publication supplements, but does not replace the requirements and procedures specified by IRS Publications 1345 and 1346.

In some parts of this document, you are instructed to refer to our tax booklet instructions for further details. This is because the information included in these specifications cannot possibly provide all the various tax booklet instructions and tax law details necessary in the preparation of the Nebraska return. **If you need information beyond what is provided in this document or you need further details, locate our tax booklet instructions on our Web site under "Tax Forms", and then under "Current Forms".** You may obtain preliminary drafts of our tax booklet by contacting our Forms Design manager at 402-471-5637.

**Additionally, this document provides an e-mail address for contacting the department's legal staff for further tax law explanations, when needed (see Section 2, Nebraska Contact Personnel).** In addition to these specifications, the department provides access to various related tables, files, and printed information, some of which are Appendices to these specifications.

Related forms, tables, text files and other publications noted below are posted on our Software Developer's Web page at <http://www.revenue.state.ne.us/electron/develop.htm>. Web site files and publications are normally in PDF, MS Word, or text format. These include:

## ACKNOWLEDGMENT SYSTEM

### 3.1 OVERVIEW

- Nebraska employs Reject Codes for a limited number of errors.
- Nebraska Reject Codes are different than those used by the IRS.
- Reject Codes are provided through a separate document posted along with these specifications.
- In the event that a Nebraska return is received and fails edit checks after acceptance, if needed, the department will contact the ERO/taxpayer to obtain the corrected information.
- Transmitters should contact the department only if the state acknowledgment file has not been made available within five business days after the federal and state returns have been transmitted.

### 3.2 NOTIFICATION CODES

Nebraska issues two types of Notification Codes:

“A” = Accepted

“R” = Rejected

The “A” Acceptance acknowledgment indicates that the department has received the return and it has passed the E-filing program's initial edits. It does not indicate that the return has been completely processed. After E-filed returns have been initially edited and the “A” Acceptance acknowledgment is sent, returns are further edited in the state's mainframe processing systems for other error conditions that could delay processing of the return. An Acceptance acknowledgment does not ensure that the refund will be paid as requested.

The “R” Rejection acknowledgment indicates that the entire return has been rejected. The return must be corrected and re-transmitted as a State-Only return, or filed on paper. Each Rejection acknowledgment will include one or more ACKR records identifying error conditions. If a return is rejected by the IRS and later re-transmitted, any corrections made to the federal return must be carried over into the state return.

### 3.3 REJECT CODES

Nebraska Reject Codes are designed to ensure that the return contains all necessary forms, schedules, and worksheets, that they are complete, and that there are no other structural errors in the return or its individual fields as defined in the Generic Record layout. The department posts the Nebraska Reject Codes document on the Developer Page of our Web site, and this document is e-mailed to participating developers.

### 3.4 CONVERSION TO PAPER

If it becomes necessary to mail in an electronic return that has been rejected and not resubmitted as State Only, the procedure to follow is:

1. Correct the portion of the return that has been indicated as in error.
2. Attach the original Form 8453N (including all withholding documents) to the back of the return.
3. Attach all necessary state and federal forms, schedules, and any other documentation needed to substantiate the Nebraska return.
6. Mail all to:

Nebraska Department of Revenue  
c/o Post Processing Section  
P. O. Box 98903  
Lincoln, NE 68509-8903

### **3.5 BANKING REQUEST ERRORS**

Nebraska supports direct deposit for refunds and electronic funds withdrawal (EFW) for tax payments. Incorrect or incomplete banking information will cause these banking requests to be denied.

If it is a direct deposit and the banking information is invalid (e.g. bad RTN, missing Account Number) we automatically convert it to a paper refund check. We do not contact taxpayers for this type of error, however an explanation is printed on the taxpayer's refund check.

If the requested banking function is an EFW and the banking information is invalid, we send a letter to the taxpayer explaining in detail the problem, providing them with a Payment Voucher, and reminding them to pay. There are a number of conditions that could cause an EFW to fail, and this is explained in the letter. These include:

- The debit amount must be present, greater than zero, and cannot exceed a tolerance of 15% above the amount owed.
- The debit date must be present and a valid date.
- The account number must be present.
- The routing number must be present and a valid RTN.
- An EFW cannot be requested for a zero balance or refund return

NOTE: When determining if the debit date is valid, if this date is less (older) than current date, and the current date minus the Debit Date is greater than 7 days, we consider it to be too old to process and therefore invalid.

# SECTION 4

## SOFTWARE TESTING

### 4.1 TESTING OVERVIEW

Nebraska requires all software developers offering Nebraska electronic filing to test with the Department. **Returns received without a valid Software License Number will be rejected.**

### 4.2 TESTING PROCEDURES

- **Before transmitting your first test returns, you must complete and submit the Nebraska Software Developer Information Sheet.** This is available for download on the Software Developer page (see contacts), and it will be directly e-mailed to all current approved developers. You can request that it be faxed to you by calling the department at 402-471-5785. **Complete this form and fax to the department at 402-471-5608, attention “E-Commerce Section” prior to beginning testing.** When the department receives this form, we will provide you with a Software ID Number that must always be present in both test and production returns. The contact you list on the form will be called and provided with this Software ID. This is your notification that you can begin testing.
- Publication 1436N, Nebraska Test Package is available on our Web site. It will be e-mailed to all current approved developers and to the NACTP listserv. A hard copy of the test package can be requested by e-mailing the Testing Coordinator at this address: [Brian.Catlin@rev.ne.gov](mailto:Brian.Catlin@rev.ne.gov).
- The primary testing period for each processing year will begin with the start of federal testing, and conclude with the start of live transmissions. Testing before or after primary testing period is allowed, but must be scheduled with the department. The department will allow testing prior to completion of federal testing.
- If a developer offers more than one type of product (e.g. Practitioner and Online), these will be assigned separate testing Software ID Numbers, and must be tested separately.
- One test scenario will be identified for purposes of testing State-only filing. If you do not support State-only filing, this return should be transmitted as a regular Fed/State return.

### 4.3 TEST RESULTS AND SOFTWARE APPROVAL

- When testing is conducted, generic and unformatted test records received will be compared to expected results.
- All detected errors will be noted and results of the compares will be provided to the developer in a formatted report. The Department will provide test results to developers by e-mail or fax, normally within one working day of retrieval of test files from the IRS Service Center.
- When testing is conducted, Generic test records will be tested first. When all Generic state records pass testing, their associated federal Unformatted records will be reviewed.
- After both record sets are approved, you will be provided with a Nebraska Software Developer Agreement that contains your production Software ID. **Make certain your production Software ID is present in all production returns.**
- Any changes to developer software after state approval requires re-testing with the Department.

# SECTION 5

## GENERAL FILE FORMAT INFORMATION

### 5.1 FILE CONTENTS AND FORMATS

- Nebraska uses the Generic Record to capture the Nebraska return and, if present, Nebraska Schedules and other state forms. All allowed Nebraska forms are contained within the Generic record.
- No state forms or schedules are contained in the Unformatted records. Nebraska uses the Unformatted record(s) to capture a copy of the federal return, federal forms and schedules, and all withholding documentation.
- Nebraska uses the standard 120-byte state Acknowledgment Record format.

### 5.2 FIELD FORMATS

The record field definitions that follow include these requirement indicators.

Always Required	Fields shown as Always Required must always contain non-blank, significant data.
Required	Fields shown as Required must contain non-blank, significant data except when the field must be blank as noted in the edits/definition column.
Optional	Fields shown as Optional contain non-blank, significant data only when the preparation of the return calls for use of the field.
Not Used	Fields shown as Not Used must always contain blanks unless otherwise specified.

Electronic banking fields are not listed as required but, if used, all necessary data must be valid and complete. If these fields are missing or invalid, the requested banking function will be denied.

All money fields (Numeric Fields) are 12 characters, 11 numeric followed by negative sign (-) if a negative entry. If positive entry, the last position must be blank. No dollar signs, commas, periods or other non-numeric characters should be inserted into any numeric field.

### 5.3 MODIFICATIONS FROM LAST VERSION

Changes to detail specifications from the last release are indicated with an asterisk , and with a notation of either **NEW** or **CHG** (change) in the Sequence Number column. Line number references that have changed are not noted in this manner, however, are shown in bold text.

# SECTION 6

## APPENDICES

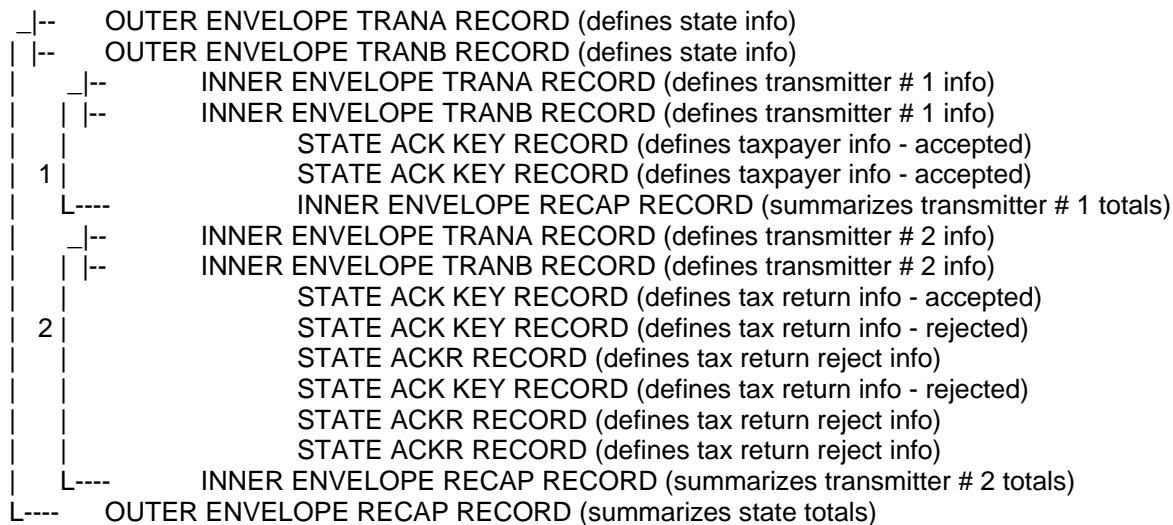

This section defines the Nebraska formats for the Nebraska Acknowledgment file records, and Nebraska Generic records and Unformatted records. The Generic record layouts show columns for IRS Sequence Number, field name, form line number, field length, allowable characters, field definitions and edits. (Appendices B and C).

# APPENDIX A

## ACKNOWLEDGMENT FILE RECORD LAYOUTS

**NOTE: Nebraska uses the 120-byte acknowledgement format posted on the IRS system.**

This section describes the Acknowledgment file structure and record formats. The following diagram shows the order of a typical state acknowledgment file. In this example, there are two transmitters. The first transmitter had two accepted returns. The second transmitter had one accepted return and two rejected returns. One of the rejected returns had one Reject Code issued and the other rejected return had two Reject Codes issued. Each ACK KEY record rejected can have as many as 96 ACKR records, each containing a single Reject Code.

## NEBRASKA UNFORMATTED RECORD LAYOUT

### 6.5 UNFORMATTED RECORD (FEDERAL FORMS)

Nebraska uses the unformatted record to capture federal filing information only. This includes the federal return, Form 1040, Form 1040A, or Form 1040EZ, all federal schedules, and withholding documents Forms W-2 and 1099. **No Nebraska forms are defined within the unformatted record.** Nebraska supports only the variable option for unformatted records. **As many as twenty-five unformatted records can accompany a single generic record.** Each of the unformatted records consists of 52 positions of header data, up to 4,800 characters comprising IRS documents (60 lines with 80 characters each), plus a record terminus for a maximum of 4,853 positions. **If the required federal data requires more space than will fit in the 9 unformatted records, the return is not eligible for electronic filing.** The Department will:

1. Require the complete federal return, 1040, 1040A (page 1 and 2) or 1040EZ (page 1) be imbedded in the first occurrence of the nine unformatted records (including header).
2. Specify that all data in unformatted records be in variable format and that the federal field numbers defined by the IRS be used in the imbedded data.
3. Require that if more than one unformatted record is used, that imbedded federal forms are not split between records.
4. Store the data in the same method as the IRS, with the data being preceded by the field number. The federal data in the state unformatted records should contain only the symbols and abbreviations allowed in federal records and be identical to the IRS data with the exception of four characters. For these characters, a state record character should be substituted for the corresponding IRS value. The characters are:

State IRS Character	Substitution Character	ASCII Hex	EBCDIC Hex
----- ****	----- !!!!	----- 21212121	----- 5A5A5A5A
[	{	7B	C0
]	}	7D	D0
#	\$	24	5B

Nebraska requires federal forms within the Unformatted Record(s) to follow this sequence:

1. Form 1040 (or 1040A, or 1040EZ) Page 1
2. Form 1040 (or 1040A) Page 2
3. Federal forms or schedules transmitted with the federal filing (including Form 2441 and any other federal forms required by the state ).
4. Forms W-2
5. Forms 1099
